Department of Social Welfare
Activities

Government-Funded Project: Brain Korea 21 Four

- The advanced systems of the SKKU Department of Social Welfare have helped the faculty and students increase their academic achievement through participation in Phase three of the Brain Korea 21 Project since 2016.
- Our department has an excellent research team for the collaborative development of social services through social innovation, and is participating in the Brain Korea 21 Four Project that began in September 2020 with the aim of developing and implementing social services using innovative strategies to address new social problems that have emerged with the appearance of the Fourth Industrial Revolution.

Research Center for Social Welfare

- Our Research Center for Social Welfare supports faculty members and research fellows engaged in diverse research agenda focused on the needs and problems of vulnerable groups in society and the social policy and service delivery systems related to these populations.

Global Partnerships

- Connecting with excellent foreign undergraduate and graduate students with international competence
- Collaborative research utilizing a global alliance with leading universities in many countries around the world

Student Organization

- Students in our department form a student council, providing student-led clubs and activities that help students feel connected and share enthusiastic debate about social issues and creative solutions.

About the Department

Department of Social Welfare, established in 1991, has been providing courses to train professionals who solve various social problems in society using creative and innovative approaches through research, evaluation, and sharing education. Our department offers bachelor’s, master’s, and doctoral degrees in social welfare and features eight faculty members with global research achievements and expertise in social policy, social services, and social work practice with vulnerable populations.

Vision & Mission

The mission of the Department of Social Welfare at Sungkyunkwan University is to develop leaders in social work practice and social welfare policy who promote human rights and social justice by addressing complex problems that will appear in future society through the cultivation of globalization, innovation, and social impact.
